

**28<sup>th</sup> August 2025**

### **Mid Year Report 2025**

We as well experience the climate change in Nkongsamba. There is constant rain throughout the day; sometimes heavy and sometimes drizzling. The temperature has fallen to 20 degrees Celsius compared to the usual 25/26 degrees Celsius in the raining season. All people feel cold and wear thick jackets.

Since January 2025, two building projects are going on in Manna Eye Clinic Nkongsamba. The first project is the extension of the clinic by connecting the main building to a side house of ours. On the small house an additional storey was also raised. The work is still going on

and everything is in disarray. The untidiness and the dirt however do not disturb the Cameroonian co-workers but only me the German.

The second project is the digging of a borehole to relief constant water shortage. Water was found at 60m depth in the patients house situated 500m apart from the main clinic. Connecting tubes were laid to the main clinic and water towers built.

Our co-worker Fon Regina Akeh returned from  
Gambia after a successful training with  
a distinction pass as an Ophthalmic Nurse in July  
2025 .

The most serious matter is the forth coming Presidential Election on the 12<sup>th</sup> October 2025.  
The party proposes the same candidate again. The main opposition leader was disqualified.  
We fear a civil war after the elections and are praying for peace in Cameroon.

Dr. Elisabeth Herz  
Ophthalmologist In-Charge
